THE NEXT 30 DAYS, IN ORDER

1. Claim the Google Business Profile at 1151 S Main St, Cheshire and keep the hours current. This is the one that feeds Apple Maps and most voice search.
2. Publish the record above, unchanged, on the site footer, the Google profile, Bing Places and Facebook. Same punctuation everywhere, or the mismatch becomes the finding.
3. Add LocalBusiness markup to the site root so directories stop reading an empty record.
4. Post the address to OpenStreetMap, then re-check the 10 missing surfaces in 30 days. Hotfrog and OpenStreetMap are the slow ones.

Method: each surface queried against the registered name, street and town on the audit date, and the firm's own homepage read for phone, town and LocalBusiness markup. OpenStreetMap queried by name and address and, where that misses, by postcode. A listing counts as present only where the surface returned the name at or near the registered address. No record means checked and not returned. The registry record is the state filing; the audit does not alter it.
